

MAR Display Text for Oral Chemotherapy Meds Go-Live Feb. 27

All **oral** chemotherapy meds used to treat malignant indications will display red text on the inpatient MAR saying the medication must be administered by a chemo-certified nurse. No red text will show if it is not used to treat malignancy.

Text will display on inpatient MARs; Heme/Onc Clinic will be excluded.

The following oral chemotherapy meds that may be given for non-malignant indications will include an order indication question: mercaptopurine, hydroxyurea, methotrexate, cyclophosphamide
